Skier triggered wind slabs in Hyalite

Maid of the Mist Northern Gallatin 12/4/2018 Code SS-ASc-R2-D1-S Elevation 9000 Latitude 45.41280 Longitude -110.97800 Notes

From e-mail: "We bailed on plan A (bigger <u>couloir</u>) because of the visual signs of rapid <u>wind loading</u>. We proceeded to plan B and started getting shooting cracks on small convex rollers. We found a nice small test slope and remote triggered a decent fresh windslab. It was surprising the energy it ran with. We decided to bail on plan b and head home. Remote triggered another smaller <u>wind slab</u> turning around."
