

# Natural Deep Slab Flanders

Flanders Creek  
Northern Gallatin  
2/18/2021  
Code  
HS-N-R4-D3-O  
Elevation  
9600  
Aspect  
NE  
Latitude  
45.43300  
Longitude  
-110.94300  
Notes

From obs [2/20/21]: "We observed a large natural [slide](#) on Flanders Mountain that likely occurred on Thursday (2/18/21). The crown ranged from 2-5', but it's hard to gauge how wide it was, because it covered a lot of elevations. I think there is considerable overlap with the large [slide](#) that ran there earlier this season. We did not observe any other slides, collapsing, or cracking, but the wind did pick up in the early afternoon."

Number of slides  
1  
Number caught  
0  
Number buried  
0  
Avalanche Type  
Hard slab avalanche  
Trigger  
Natural trigger  
R size  
4  
D size  
3  
Bed Surface  
O - Old snow  
Problem Type  
Persistent Weak Layer  
Slab Thickness  
60.0 inches  
Vertical Fall  
700ft  
Slab Width  
1500.00ft
