## Pyramid Point, wind slab avalanche, 10,000ft. East Aspect

Date
Sat, 03/27/2021-11:30
Activity
Skiing
We were skinning up Pyramid Point from the East. as we approached $10,000 \mathrm{ft}$, we encountered a wind slab on an East Facing slope. it was about 1-2 inches where we encountered it but it quickly propogated. the crown was 18-20 inches at its highest and about 150 feet wide. the debris ran for about 200 feet.

## Region

Southern Madison
Location (from list)
SOUTHERN MADISON RANGE
