Activity

Skiing

Skied the east ridge of Blackmore. Dug a pit at 9500 feet on a SE facing slope, HS 70cm, 25cm of F hard snow on top of a mix of facets and ice crusts. ECTX. Dug a second pit at 9800 feet just off the ridge line, SE aspect, HS 90cm. ~25cm F hard snow on top of ~25cm 1F hard slab above a mix of facets and ice crusts. ECTP26 below the 1F slab. Headed back down the ridge a bit to lower angle terrain. Skiing was terrible, wind effect and breakable crust everywhere. Lots of slopes on all aspects are stripped from all the recent winds.

Region

Northern Gallatin

Location (from list)

Mt Blackmore

Observer Name

Mike Lavery
