

2 small slides in Upper Teepee Basin, Snomo triggered

Date

Fri, 02/25/2022 - 14:55

Activity

Snowmobiling

18 inches of new snow from last week slid on top of crust layer. The slide on the left was triggered by an uphill snowmobile hill climber, the slide on the right occurred when snowmobile turned out of a hill climb and his track broke through the crust layer causing everything within his up and downhill track to slide.

Region

Southern Madison

Location (from list)

Tepee Basin

Observer Name

Tim Campbell
