

From email: "Saw debris from a fairly recent slab avi that slid in lookers right of arrowhead bowl (tough to see in photo but the crowns appeared to be a couple feet deep). There were a bunch of other debris piles on similar aspects but I was too far for photos. They probably slid on Friday night [4/22/22] as the debris had a few inches on top. "

Advisory Region
Bridger Range
Longitude

-110.96W

Latitude

45.90N
