

Wind slabs on Hyalite Peak

Date

Sat, 11/12/2022 - 15:30

Activity

Skiing

Skied Hyalite Peak today and found a wind slab ~10cm deep. Ski cut a small cornice below the main face and broke a small slide that carried ~20' with little energy with a ~25' wide crown

Region

Northern Gallatin

Location (from list)

Hyalite Peak

Observer Name

Colten Crowe
