

Bradleys meadow, weak snow

Date

Sun, 01/08/2023 - 11:00

Activity

Skiing

@ 7740' east south east aspect 20 deg slope we found HS 87-105cm, large grain faceted snow near the ground, ECTN 29 @ 55cm above Xmas crust. Saw multiple D1-D2 DL or unknown (couldn't see crown) in ramp/ wolverine/ hourglass couloir.

Region

Bridger Range

Location (from list)

Bradley Meadow
