

Snow obs near Cooke, ECTN's

Date

Thu, 02/02/2023 - 03:50

Skied the last 2 days north of Cooke City in the mid and lower elevations (between 7k'-9,400'), all wind sheltered locations. Great skiing.

Did ECT's at:

8500' SE [aspect](#),

9000' N [aspect](#)

9300' N [aspect](#)

All snowpits had ECTN's, just the width of the shovel blade- at the new/ old snow interface which is about 30-40 cms deep. .5-1mm SH and NSF layer as LOC.

No collapsing nor cracking the last 2 days.

No new avalanche activity to report. Sunny and about 30F for a high today.

Region

Cooke City

Location (from list)

COOKE CITY
