Cornice crack triggered by skiers

Mt Blackmore Northern Gallatin 2/11/2023 Code C-ASu Elevation 9600 Aspect NE Latitude 45.44340 Longitude -110.99700 Notes

Also of note, as we traversed a corniced ridge later in the day, two of our group members simultaneously came too close to the edge of a <u>cornice</u> and it broke away, but did not fall down the slope. Fortunately, everyone was alright, but it was a close call and we will definitely be more mindful next time. We believe the <u>cornice</u> was made more sensitive by the warm weather over the past few days.
