

wind pillows at bacon rind

Date

Sat, 02/25/2023 - 12:00

Activity

Skiing

Lots of snow transport at all elevations from valley floor to ridgeline. Strong S-SSW wind. Ridge lines were getting scoured to crust, leeward wind pillows forming. Pillows were gaining cohesion and broke ~5-10' wide and up to 20-25cm deep on small test slopes.

Broken cloud cover, trace of new snow.

Region

Southern Madison

Location (from list)

Bacon Rind

Observer Name

matt zia
