

Many naturals and 1 human triggered slide

Date

Tue, 03/07/2023 - 14:15

Activity

Snowmobiling

We saw 6 natural avalanches on our ride in Lionhead. They all involved snow in the last week or two. On our exit we ran into who a group that witnessed a sledder triggering this slope. It was about 3 feet deep and was clearly wind loaded. Luckily he was not caught. When folks are triggering slides we know other slopes are also unstable. Be careful out there!

Region

Lionhead Range

Location (from list)

Airplane Bowl

Observer Name

Doug Chabot
