

Deep Slab Avalanche in Mt. Abundance

Date

Sat, 04/08/2023 - 13:55

Activity

Skiing

Documenting local avalanche cycles, attached is a photo of an avalanche on the south face of Mt. Abundance taken yesterday, that likely happened last Sunday (?) when we got 1" of SWE overnight. Lots of debris chunks the size of refrigerators. Crown mostly covered by wind blown snow.

Region

Cooke City

Location (from list)

Mount Abundance

Observer Name

Beau Fredlund
