

# Lionhead Old Ski Hill

Date

Sun, 12/10/2023 - 16:25

From email: "I dug a pit in the normal location to check the snow pack conditions and here's what I found.

Aspect: East

Slope Angle: 19

Elevation: 8100ft

Total pit depth 70cm

Winds: light 5mph with gusts up to approximately 15mph. I wasn't on the very top of the ridge so I was a little protected.

ECTP 22 The failure was right at the old snow and new snow line 27cm up from the ground.

The snow coverage of the parking lot, trail up and off trail areas wasn't great, but I've seen worse."

Region

Lionhead Range

Location (from list)

Ski Hill

Observer Name

Jim Norlander
