

Snow Pit Profile  
**Bacon Rind South**  
**S. Madison, MT**  
 Elevation (ft) **9000**  
 Aspect: **90**  
 Specifics: **We skied slope.**

Observer: **Doug Chabot**  
**Tue Mar 22 11:50:00 MDT 2011**  
 Co-ord: **N W**  
 Slope: **35**  
 Wind loading: **previous**

Stability on similar slopes: **Good**  
 Air Temperature: **-3 C**  
 Sky Cover: **sky 8/8 covered**  
 Precipitation: **Snow - 2 cm/hr**  
 Wind: **Calm**

**HS240**  
 Stability Test Notes:  
**20: stable**

Layer note  
**15-20: Pro**

Notes: The weak layer is stellars from 2 days ago. I was surprised how easily and cleanly the slab fractured. I do not expect this weak layer to last more than a couple days. No other layers concerned me. This snowpack looks more solid than Eric's visit on March 12th.

Advisory Region  
 Southern Madison
