

Snow Pit Profile
Beehive - Tylers
N Madison, MT
 Elevation (ft) **8938**
 Aspect: **235**
 Specifics: **Ski tracks on slope.**

Observer: **Mark Staples**
Thu Dec 18 12:00:00 MST 2014
 Co-ord: **45.32369 N 111.38349 W**
 Slope: **29**
 Wind loading: **no**

Stability on similar slopes: **Fair**
 Air Temperature: **C**
 Sky Cover: **sky < 2/8 covered**
 Precipitation: **None**
 Wind:

Stability Test Notes: Layer note
26-29.5: P

Notes: Another pit 10 feet north produced ECTP on depth hoar at ground (~6cm). Either way this snowpack is just waiting for a load, then everything will break and make avalanches. Not sure which is the weakest layer. Its all bad. Avalanches will have many faceted layers on which to break.

Advisory Region
 Northern Madison
